FENESTRA AETERNITATIS

SIGNS AND JOURNEYS

SYNOPSIS:

All is one, earth and heaven, matter and spirit, interior and exterior. Divisions, opposites and time only exist as a frame of reference for purposes of distinction. The only time for experience is this very moment – now. The only place is here.

In different land and cityscapes, events and situations, in parks on the lake, on an airplane, in a café at the station or in encounters with different people, there are always moments when the borders between supposedly solid material reality and interior worlds blur. Transitions become possible, journeys begin, insights open which, in due course, might turn out to be of universal significance. Some of those moments, captured in notes and sketches, became the paintings and poetry of this volume.

FENESTRA AETERNITATIS is a collection of mystic poetry and water color paintings of oracles and prophesies, journeys to other-worlds, where one can see the signs, where wonders never cease, worlds that are nothing else than this world.

The minimalistic signs embedded in the rather unpredictable water colors represent order as grown out of of assumed chaos.

The collection comprises 21 journeys and 24 signs.
