FENESTRA AETERNITATIS

Signs and Journeys

SYNOPSIS:

FENESTRA AETERNITATIS is a collection of mystic poetry and water color paintings: oracles and prophecies – travel logs of journeys to Otherworlds, and visions, condensed in signs.

In different land and cityscapes, during events and situations, in parks, on a train or a flight, in a café or in encounters with different people, there are always moments when the borders between supposedly solid material reality and other worlds blur. Transitions become possible, journeys begin, insights open which, in due course – might turn out to be of universal significance. Some of those moments, at first only fixed in notes and scetches, became the paintings and poetry of this volume.

The minimalistic and almost exclusively geometric signs, embedded in the rather unpredictable water color way of painting intertwines a free style symbolism and the universal metaphors found in far-Eastern mandala and tangka art, medieval mysticism and traditional symbols of the wisdom traditions, world cultures and sacred geometry. The background color of chaos underlines the symbolic meaning.

The collection comprises 22 texts and 25 signs in water color.
